

Looking for a career
that makes a difference?

Be part
of the

Energy Future

TransGrid

At TransGrid, your career could be anything but ordinary.

You'd be quietly improving the lives of millions – from lighting up schools, homes and streets, to powering local businesses, hospitals and everything in between.

About our Apprenticeship Program

Each year, TransGrid offers electrical apprenticeships at various locations throughout New South Wales (NSW).

As a TransGrid apprentice you can look forward to hands-on learning and development. You will have the opportunity to work on significant infrastructure projects that will shape the future of the energy industry in Australia, including connecting renewable energy to the network.

We provide a structured development program for our apprentices.

During your apprenticeship you will be participating in development activities like:

- Hand-tools and workshop machinery skills
- Welding courses
- Nationally accredited safety training and various high risk licenses
- On-the-job training
- TransGrid technical skills development in a variety of specialist areas

On completion of the apprenticeship you will be fully qualified as an Electrotechnology Electrician.

“Teamwork at TransGrid is everything. The thing I like most about my job is knowing that something I have done, whether it be assisting a tradesperson or doing something on a job, has made a difference and is contributing to the completion of the job.”

Jess Bright, Second Year Apprentice - Electrical Fitter

To be considered, you must have:

- Completed high school studies (minimum year 10 or equivalent) and have sound mathematics and communication skills
- An interest in a trade working within a high voltage electricity transmission network
- A current driver's licence or be willing to obtain one as soon as possible after appointment

Selection process

- 1 Complete an online Application
- 2 Complete the online Selection Test
- 3 Submission of current resume and transcripts/school reports
- 4 Invitation to attend verification test and behavioural test
- 5 Invitation to attend an interview and work specific assessment
- 6 Successfully complete the pre-employment assessments
- 7 Appointment Offer

A career at TransGrid includes:

A friendly and open team oriented culture

An exciting and rewarding place to work

A competitive salary plus superannuation and allowances

15% Superannuation

9-day fortnight

Protective clothing and tools required for the job

Access to study assistance

Salary sacrificing for superannuation and motor vehicles

A flexible workplace and leave provisions to encourage a healthy work/life balance

Help us connect Australia to a renewable energy future

At the heart of the national electricity market, our high voltage transmission network connects more than 3.5 million homes and businesses across New South Wales (NSW) and the Australian Capital Territory (ACT) to safe and reliable electricity.

We take a leading role in encouraging the connection of renewable generation and, more broadly, the transition to a low carbon future.

We offer fulfilling careers where every person is encouraged to take advantage of ongoing opportunities to develop their skills. Our people come from a broad range of backgrounds that reflect the communities we serve, and bring different perspectives to different challenges.

Together they play a critical role in our continued success.
